# GOODRICH SOLUTIONS WALLCOVERING 237 | GARNET

## PREMIERWALL 2022 – 2025.12 COMMERCIAL | HOSPITALITY | RESIDENTIAL

## PREMIERWALL GARNET LOW VOC

50 - 54" Fabric-Backed Contract Wallcovering

### PHYSICAL PROPERTIES

Weight(avg)20 oz. PLY / 620G/PLMRoll Size50/54" x 30ydsBackingOsnaburg / Non WovenMeets or exceeds Federal Specification CCC-W-408D for Type II Wallcovering

#### FIRE SAFETY

- Class "A" fire rated tested in accordance with ASTM E-84 Tunnel test
- Flame spread: 25 / Smoke developed: 45
- Passes NFPA 286 Corner Burn Test

#### **ENVIRONMENT AND HEALTH**

- The product has been assessed according to the assessment criteria of the Singapore Green Building product certification scheme.
  Meets California section 01350 IAQ test requirements for wallcovering
- Meets California section 01350 [AQ test requirements for wallcovering
   Can contribute to LEED EQ 4.1 point for low-emitting materials, adhesives, and sealants, if used with low VOC adhesives

Can contribute to LEED MR 5.1 point for regional materials

#### ANTI-MICROBIAL FEATURES

**PREMIERWALL GARNET** can be perforated, with 30 yard minimum requirement, for enhanced permeability. This product is intended for use in buildings that are properly designed and maintained to avoid moisture infiltration, condensation and/or accumulation at wall cavities and wall surfaces, particularly in warm, humid climates. Goodrich wallcoverings contain anti-microbial additives to resist the growth of mildew and bacteria and pass ASTM G-21. These additives will not prevent mold growth if residual wall moisture is in excess of 4% and/or is allowed to accumulate in or behind the walls.

#### BATCHING

Since slight variation in shading may occur time to time, it is important that the roll carrying the same batch number be used in any one area.

#### ORIGIN

USA

## **SHERWOOD**

PWG0108 Aged Cedar

#### **SPECIFICATIONS & PROPERTIES**

## **BEFORE YOU BEGIN**

Examine the material carefully to ensure that the pattern, colour, and quality are satisfactory and as ordered. Check that the quantity and dimensions match the required specifications, prior to cutting. In the event that any discrepancies are found, STOP and contact Goodrich Global before proceeding.

We recommend that the wall moisture content does not exceed 4% using a reputable moisture meter, and that active moisture infiltration, condensation, and/or accumulation - particularly in warm, humid climates - is not present. If walls show mould, mildew or visible moisture damage, or if moisture content exceeds recommendations, do not proceed with installation until the condition has been fully corrected under the direction of a qualified professional. Goodrich Global will not be responsible for any performance or quality issues if moisture problems are not addressed before or following installation.

## **HANGING GUIDELINES**

Wallcovering rolls are numbered consecutively and should be cut and installed in reverse sequence, starting with the highest numbered roll. All strips should be hung in sequence as they are cut from the roll, using full widths of material, whenever possible. Install the wallcovering under permanent lighting conditions to evaluate colour and texture uniformity.

When hanging non-reversible or matching patterns, measure the wall height, allowing for pattern match, add 4", and table trim using a straight edge to ensure alignment across seams. Large, dominant pattern repeats require more careful planning as far as starting point, ceiling line, chair rails, door/window headers, etc. Patterns are meant to match at eye level and may run off slightly at the top and bottom of the wall. When hanging textured or random-match patterns, reverse hang alternate strips for a more uniform appearance; overlap and double cut, being careful not to score the wall. If the pattern effect is not acceptable after three strips are hung, re-hang strip #2 without reversing.

If any defect, colour variation, or unacceptable pattern effect is noticeable after three panels are cut and hung, STOP and contact Goodrich Global immediately. Goodrich Global cannot accept any claims on labour or material after more than three lengths have been installed.

#### **ADHESIVE APPLICATION**

Apply a uniform coat of a premixed vinyl wallcovering adhesive to the back of the material using a short-napped paint roller or stiff bristle brush (a pasting machine can be used at the installer's discretion). Goodrich WA202 adhesive is recommended for heavyweight vinvl wallcovering. Fold each sheet over and allow up to 10 minutes booking time for the adhesive to penetrate the backing of the lightweight vinyl material (up to 15 minutes for heavyweight vinyl), and to avoid paste drying at the edges.

## Goodrich WA202 Wallcovering Adhesive :

- Specially formulated for all types of contract wallcoverings •
- Non Hazardous, Non Toxic, Non Flammable, Non-Staining •
- Solvent Free and Formaldehyde Free .
- VOC is 0.45mg/kg

#### **INSTALLATION**

Hang the first strip to a plumb line, overlapping the ceiling and baseboard, within 12 minutes of paste application. Use a stiff bristle brush to ensure that the wallcovering makes contact with the wall. A plastic smoother can also be used on non-metallic Vinyls, providing only light pressure is applied (do not use sharp-edged tools). Smooth from the middle to the outside edges, being careful not to stretch the material, and work out all air bubbles. Trim at the ceiling and baseboard with a sharp razor blade. For matched patterns, butt the second strip to the edge of the first and smooth out firmly. When double cutting non-matching patterns, place a 2-3" wide strip behind the seam to avoid scoring the wall. Flatten seams exerting light pressure with a seam roller. Lowadhesive painter's tape can be used to keep the face of the seams clean. Before applying the next strip, trim the top and bottom as with the first panel, and proceed in the same manner around the room.

Avoid cutting narrow widths of material for placement above doors and below windows. Vertical joints should not occur less than six inches from inside or outside corners. When trimming at chair rails and ceilings, always use a broad knife rather than a straight edge. Take extra care in keeping the adhesive off the face of the wallcovering.

Remove excess adhesive immediately with a natural sponge, frequently rinsed in clear, warm water, and dry with a soft, lint free cloth. After installation, the walls and wallcovering should be monitored for potential moisture or vapour infiltration, which must be promptly eliminated.

## MAINTENANCE

Most wallcovering is easily cleaned using clear, warm water and mild soap with a natural sponge. A soft cloth or towel should only be used to tamp dry (do not rub). Stubborn stains can be removed with a laundry spot remover or rubbing alcohol. Do not use solvent-based cleaning agents, lacquer thinners, nail polish remover, pine oil, or cleaning agents containing bleach, which may cause discoloration over time.

Note: The above is intended only as a guideline. Wallcovering installations must conform to current hanging instructions included with each shipment. The installer has final responsibility for proper installation and evaluation of jobsite conditions.
