CONSTRUCTION DOCUMENTATION, TASK & DEFECT MANAGEMENT HAVE NEVER BEEN SO SIMPLE.

Efficient quality assurance is essential in construction and real estate projects. With PlanRadar, you can be sure that every project participant receives all relevant information immediately, and everyone is on the same page with the latest information. This saves time, resources, stress and up to 70% of your costs. In the past, it's often been difficult to manage quality assurance. Between internal and external project teams and various specialists, it's just too easy to end up with planning chaos and gaps in information. Particularly when it comes to defect management, project participants can end up swamped in confusing information from a mishmash of data recorded via cameras, dictaphones, and notes scribbled on plans – which is then communicated and documented via different channels, resulting in inconsistent versions of documents, and, in the worst case, loss of information. PlanRadar puts an end to all these scenarios.

PLANRADAR, YOUR EFFICIENT, STRUCTURED SOLUTION.

SIMPLE RECORDING

Documentation takes place directly on site or in the building, via your smartphone or tablet. It's just one step to enter an image, text, date, voice memo and position into the digital plan – even if your device is offline.

DIRECT COMMUNICATION

Simply press a button and defects or orders are forwarded directly to the responsible contractor, along with resolution deadlines and priorities. All communication between participants takes place within the PlanRadar system or via email.

GAP-FREE DOCUMENTATION

Keep track of your projects and defect resolution progress. Automatic logging means you can check on all processes at any time – no gaps – and get an individualised report at the press of a button.

GDPR COMPLIANT

IMMUTABLE LOGGING

ISO-CERTIFIED SERVER

PROJECT ARCHIVING

WHEREVER YOU ARE, WHENEVER YOU NEED IT, PLANRADAR IS THERE FOR YOU.

PlanRadar gives you secure access to your information from every location, via web browser or mobile app. You and all project participants always have access to the latest data, whatever device you use.

- Manage projects, users and plans
- Automatically generate reports

- Record information online or offline
- Manage and edit information

ONE SOLUTION. MULTIPLE ADVANTAGES.

UPLOAD PLANS
Plans are uploaded as PDF or image files. It is also possible to upload plan updates.

STATISTICS
Statistical visualisations allow you to view the current status of all defects and orders at a glance.

EXPORT AND ARCHIVING
You can save your entire project onto your local infrastructure as an excel or PDF file with photos and voice memos – at any time.

FILTER
Individually customisable filter functions mean that you can see exactly the data you need. Once you have created a filter, you can easily save it for future use.

USERS
You can invite users to join your projects. Depending on the rights and roles allocated, project participants can administrate the platform, document items, and manage tasks and defects.

NOTIFICATIONS
Contractors and clients are informed immediately about changes and new information. Notifications are sent both within PlanRadar and via email.

Outstanding buildings require efficient construction documentation. PlanRadar provides simple, rapid defect management for our architects and engineers, on site and in the office.

Univ.-Prof. Architect Christoph M. Achammer, CEO ATP architects engineers

At CBRE, we are always on the lookout for new digital tools that we can use to offer our customers added value and make life easier for our employees. Since discovering PlanRadar, we have a product that achieves both of these things, as well as support from a team who know the market, listen, and are continually improving the product.
