FEATURES:

- The system is a non-motorized, safe, and simple system to remove dirt, grime, and bacteria from moving handrails.
- Specially designed microfiber cleaning pads attached to molded pad holders clean the moving handrails from "bead to bead."
- The Dolly System attaches to non-obstructed moving handrails and cleans without interrupting the operations, minimizing the impact on foot traffic.
- Handrail Cart System's patented swivel arm is easily placed for access to any handrail.
- Universal and Dolly System nested for compact, convenient transport and storage.

BENEFITS:

- Prevents the spread of viruses & bacteria.
- Extends the life of moving handrails, reducing untimely handrail replacements costs.
- Lowers labor costs and Increases productivity by allowing staff to perform other essential duties, maximizing labor efficiency.
- Prescribed cleaning frequency and time chart detailing labor time required to complete each cleaning or sanitizer application.
- No downtime equals happy customers! Cleans while moving rails are in use.
